## Work Experience

---

Research Intern Oct 2015 – Jun 2016

- Institute of Automation, Chinese Academy of Sciences, China
- Exploratory Data Analysis on data from an electronic sphygmomanometer company, design a RNN model for blood pressure prediction (Regression Task)
- Design an image and text based RNN-BPR model for Next Basket Recommendation problem, which outperformed the state-of-the-art baselines
- Develop software package and tools for colleagues

Software Engineer Intern Sept 2014 - Dec 2014

- Laboratory of Shandong University, Software Campus, China
- develop Laboratory Management System (Web Application)
- Core Function: for administrator of Laboratory to schedule labs and courses
- Requirement Analysis, Code (Team of 8 people)

Software Engineer Intern Jul 2014

- Microsoft Camp, Jinan, China
- develop Windows 8.1 App (now taken off from Windows Store)
- Core Function: for user to schedule workout plan
- Team Leader, Prototype Design, Code, Project Management (Team of 4 people)

## Education

---

Software Engineering , Shandong University, China Sept 2011 – Jun 2015

Main Courses:

- Further Mathematics, Mechanics
- Data structure, Computer Architecture

Computing Science, University of Alberta (Exchange), Canada Sept 2013 – Apr 2014

Main Courses:

- Software Engineering, Networks, Database
- Algorithm, Reinforcement Learning

## Volunteer & Club Experience

---

Race Marshal, Edmonton, AB, Canada Oct 2013

- Dash for Cellphone Free Driving run/walk
- First time volunteering in English

Campus Magazine Staff, Jinan, Shandong, China Dec 2011–Jun 2012

- work for Argue & Debate (one section of the magazine)
- organize the forum

## Awards

---

Full Scholarship for studying abroad, China Scholarship Council Jun 2013
